

NOTICE OF INDEPENDENT REVIEW DECISION

August 21, 2002

RE: MDR Tracking #: M2-02-0629-01
IRO Certificate #: 4326

___ has been certified by the Texas Department of Insurance (TDI) as an independent review organization (IRO). The Texas Workers' Compensation Commission (TWCC) has assigned the above referenced case to ___ for independent review in accordance with TWCC Rule §133.308 which allows for medical dispute resolution by an IRO.

___ has performed an independent review of the proposed care to determine if the adverse determination was appropriate. In performing this review, relevant medical records, any documents utilized by the parties referenced above in making the adverse determination, and any documentation and written information submitted in support of the appeal was reviewed.

The independent review was performed by a ___ physician reviewer who is board certified in neurosurgery which is the same specialty as the treating physician. The ___ physician reviewer has signed a certification statement stating that no known conflicts of interest exist between him or her and any of the treating physicians or providers or any of the physicians or providers who reviewed the case for a determination prior to the referral to ___ for independent review. In addition, the reviewer has certified that the review was performed without bias for or against any party to this case.

Clinical History

This 43 year old female sustained a work related injury on ___ when she attempted to catch a falling cabinet and injured her left shoulder and neck. The patient was diagnosed with cervical radiculopathy and a CT scan performed on 07/21/99 was suspicious for C3-4 protrusion. The patient has bilateral radiculopathy by EMG and complains of chronic headaches. The treating neurosurgeon is recommending that the patient undergo a cervical CT scan.

Requested Service(s)

Cervical CT scan

Decision

It is determined that a cervical CT scan is medical necessary to treat this patient's condition.

Rationale/Basis for Decision

Persistent cervical radicular symptoms over a nearly three year period of time justifies and in fact necessitates further radiographic investigation. A CT scan is a reasonable diagnostic option in the clinical setting. Therefore, the cervical CT scan is medically necessary.

This decision by the IRO is deemed to be a TWCC decision and order.
